## **INVESTOR FACT SHEET**

### **About Source Exploration**

Source Exploration Corp. (TSXV: SOP) is a gold and silver exploration and development company led by a team of experienced mining professions. Through its Mexican subsidiary, Roca Verde Exploration de Mexico S.A. de C.V., the Company is currently diamond drilling its Las Minas gold - silver - copper project, located in the State of Veracruz, Mexico. Over 2,500 metres of drilling have been completed to date and an expanded 5,000 metre drill contract is underway.

### **About Las Minas**

The Las Minas project is located approximately 270 kilometres east of Mexico City and is accessible by road. The project is comprised of five mineral concessions covering approximately 1,271 hectares in the heart of the Las Minas district in the State of Veracruz, Mexico. The district is host to one of the largest under explored gold – copper skarn systems known in Mexico, and has a strong production history that dates back to the Aztec era. Since 1870, the area has seen over 20 active mines. The district is highly prospective for both bulk tonnage gold - copper skarn deposits and high grade gold - silver epithermal vein deposits.

Las Minas Location – Mexico

## Market Drivers

### Aggressive \$4.0 M exploration program in 2011

- 7,500 metre diamond drilling program underway
- Two drills contracted with contingency for expansion
- Property – wide prospecting and geological mapping of surface and underground historical workings.

### Pursuing Acquisitions of Gold and Silver Properties

- Source is actively pursuing the acquisition of gold and silver properties in Mexico and elsewhere.
