Founder, Chairman and CEO**

BIO:

Ronald S. Tucker, 73, is our founder, Chairman of the Board, Chief Executive Officer, and Chief Financial Officer and Director. He is also the founder of and held or holds similar positions with, our subsidiaries Tensleep Technologies, Inc. (OTC:TNSP), Tensleep Wireless Corporation, Tensleep Financial Corporation, and RX Healthcare Systems, Ltd. Since 1990, to present, he has been the founder, President, and a director of

R Tucker & Associates, Inc, a financial and corporate development consulting firm, and our major shareholder. In 2005 he arranged an acquisition with our subsidiary Tensleep Technologies, Inc., a publicly trading company, with Yearonimo Media Venture, Inc., which changed its name to Commodore International Corporation (OTC:CDRL). In 2005 we spun-off Tensleep Financial Mr. Tucker is a graduate of the University of California at Los Angeles where he received a Bachelor of Science while majoring in finance and accounting. Mr. Tucker is also a graduate of the Loyola University School of Law. Mr. Tucker is a member of the California and Texas Bar Associations.

Company Profile:

EPIC CORPORATION is dedicated to make an impact on peoples lives. We strive to provide better healthcare through the acquisition, development and commercialization of technology and intellectual property. We realize, we cannot prosper in isolation. We and our strategic partners use various technologies and intellectual property to develop economical devices to reduce trauma, aid in diagnosing diseases, and provide comfort. We are committed to grow our business through research and development, production, marketing, and sales of Healthcare products and services.

EPIC's business plan is to develop, purchase or otherwise acquire technology and intellectual property for healthcare products to be sold, distributed or otherwise provided to consumers and/or commercial or industrial users such as hospitals, skilled

nursing, rehab centers, assisted living and other healthcare facilities.

**Interview conducted by:
Lynn Fosse, Senior Editor
CEOCFO Magazine**

CEOCFO: Mr. Tucker, would you tell us what is Epic focused on today?

Mr. Tucker: Epic is a healthcare company that specializes in acquiring technologies for the development, sales and marketing, of medical and healthcare devices or products.

CEOCFO: What is most important for EPIC when you are looking to acquire a product?

Mr. Tucker: We look at what the potential market and whether it is a viable product.

CEOCFO: What goes into the decision process?

Mr. Tucker: Before we got into the healthcare field we were using technology to develop electronic products. It is just sort of a gut feeling to a degree, but we evaluate the products capability and determine if it is something that the market needs, rather than just technology for itself. Right now our primary product is not an electronic product. It is an industrial textile which we have branded as AcuFad. We are productizing it into therapeutic Sleep Pads, which help prevent the development of pressure sores and can provide sleep comfort from back aches and pains. It has a lot of potential in many different kinds of products, such as seat pads, shoe inserts, as well compression bandages; just a lot of different uses. It is called AcuPad, and is made from

100% polyester. It is a knitted product, but has a very complex structure.

CEO CFO: What is it about AcuPad that makes it different than what is currently available?

Mr. Tucker: What makes it different is its structure and architectural design. It has concave and convex channels, which correspond to the acupressure points and meridians in the body. We are just starting to sell it, and we have given and are giving samples for evaluation. We have testimonials from people are saying that it helps them to have a better night's sleep. There are people that have problems, such as my mother who is 93 years old, and has had a broken hip and broken pelvis, besides compression fractures of two vertebrae. She did not sleep very well at night because of the pain when she moved.

I gave her a sample of the pad and she slept on it for one night. The next morning she walked in and said "this is the first time I have been able to sleep through the night. Not only that, but before using the pad, I had to sleep on my back and could not." That told me this is a good product.

CEO CFO: Where are you in the commercialization process?

Mr. Tucker: We are in a process of selling. We put an ad in the *Provider Magazine* for convalescent and healthcare facilities. We have gotten good response for preventing the development of bedsores. We have given a bunch of samples to them and so far for evaluation and we have received some good reviews.

CEO CFO: How do you get people to believe enough to at least try the product?

Mr. Tucker: We have been providing samples with our regular product. They are not just a little piece of fabric. We give the complete product. I

have done that for quite some people and they all have come back with, "Oh yeah it does work". One lady I gave it to had trouble sleeping at night. She was not in pain or anything like that, but she did wake up a many times. She got the sample and said that now she could sleep longer and now wakes up more refreshed. There was another person to whom I gave a sample to a man who has a broken spine, so he has had problems with for six years and developed lower back pain, and had tried everything to get rid of it. After two days of using the pad in his easy chair, he said he no longer had any lower back pain. All of these samples were basically single pads. We have testimonials from an orthopedic surgeon and a heart surgeon, an academic, who both use it and say they get much more rest than ever before.

Epic is a healthcare company that specializes in acquiring technologies for the development, sales and marketing, of medical and healthcare devices or products. - Ronald S. Tucker

CEO CFO: What are the next steps for Epic?

Mr. Tucker: I have appeared a couple of times on Money TV to tell people about the product. I am not using it to talk about the company and our stock, but to present the product to investors, so there would be people to see about it and the name would start to get out. That has paid off. We have entered into an agreement with a company to distribute the product whose business is to provide healthcare services and products. Our product will be their primary product. A lot of this is feeling the way where we will be going.

CEO CFO: Will you be targeting hospitals and nursing homes, individual consumers or across the board?

Mr. Tucker: All of the above! We are preparing television commercials. We

have already had them recorded. At some point, I hope go into the shopping television shows. We are looking into eventually coming up with an infomercial. I am continuing to use emails and direct mailings to convalescent and rehab facilities.

CEO CFO: Is this fabric made in the United States?

Mr. Tucker: Yes! It took approximately a year to develop. That is how complicated it is. It took several tries to get it to where it is right. It is a highly technical product. It is knitted on a \$250 thousand machine. I do not want to imply that I own it, but we do own the pattern wheels, so we have all the proprietary rights to the fabric.

CEO CFO: What is the financial picture for EPIC to enable the company to get recognition?

Mr. Tucker: I have little to no overhead. It all goes into buying the product, selling it and the cost of distributing. I have the production covered and I have 6,000 yards a week on just one machine. I also have the capability through the producer of the fabric to have three of those machines, so I can be looking at 18,000 yards a week.

CEO CFO: So Epic is ready!

Mr. Tucker: Yes, it is ready. We are not the strongest financially. I am not trying to imply that. Just that from a production standpoint, sales standpoint, there is no limitation. I do not have any problem with that; I can finance that.

CEO CFO: Why should investors pay attention today to Epic?

Mr. Tucker: In my opinion, it is a ground-floor opportunity. The price of our stock today is \$0.10 to \$0.24. It is a good buy. We have a great potential in this product and this is what we hope will be one of many.
