**The Most Powerful Name In Corporate News and Information**

## **Already Drilling On Oil And Gas Properties In Natrona And Weston Counties In Wyoming, Royal Energy Resources, Inc. Is Diversifying With Gold And Silver Properties In Eastern Europe**

**Resources**  
(ROYE-OTC: BB)

**Jacob Roth**  
President, CEO and CFO

### **BIO:**

Jacob Roth, President has fifteen years of experience as a financial controller with various public companies. From 1973 till 1980 helped to raise funds for oil and gas development stage companies.

### **Company Profile:**

Royal Energy Resources, Inc. ("Royal" or the "Company"), is an oil and gas exploration and production company and currently owns interests in Natrona and Weston Counties in Wyoming. Royal has developed a corporate strategy of identification, acquisition and development of domestic oil and gas reserves, thereby reducing U.S. dependence on foreign oil.

**Interview conducted by:**  
**Lynn Fosse, Senior Editor**  
**CEOCFOinterviews.com**

**CEOCFO:** Mr. Roth, what is Royal Energy all about?

**Mr. Roth:** Royal Energy is involved in acquiring oil and gas pieces... And we were participating in oil and gas drilling in Natrona and Weston Counties in Wyoming. What we are looking to do now in the mining resources sector in the Eastern European countries, as we are negotiating right now with some governments to get some license to do our exploration.

**CEOCFO:** What is your strategy on diversification of type of resource?

**Mr. Roth:** The bottom line is to build up the company to be a giant, but since gold and silver are at the prices that they are and will continue for quite a few years, and I have a connection to the European countries and there is a history over there for the last 200 years where they did find gold and silver, and since it was a communist country for years, it was not so explored. Therefore, I am looking to make it big over there discovering and developing gold, silver and copper.

**CEOCFO:** What does Royal Energy know about finding properties and looking for the right places?

**Mr. Roth:** I just found out about 42,000 acres through a company in central Colorado and about 46 miles away from a giant New York Stock Exchange company got a permit from a Wyoming oil and gas company to start drilling over there. That zone over there from what I had been told could be just as good as the Bachman field in Solomon Codad. And over there is being found 500 barrels a day, so this is very exciting news, especially at no cost to us. We will see a profit if it is found, but if not, we won't lose.

**CEOCFO:** Would you tell us about your team; who finds the properties?

**Mr. Roth:** I have a person whom I've known for years. I choose and he helps me out as he is getting paid a commission on both sides when we do deals with other companies. Some I do myself, so there would be no commission for him, plus I have a land man that I have been paying for 30 years.

**CEOCFO:** What is your two minute take on the energy situation today?

**Mr. Roth:** What I can tell you is that oil should stabilize between \$60 and \$85. Then there could be enough profits around in that range.

**CEOCFO:** Do you see a lot of competition in Eastern Europe now that it has been opened p or is it still under the radar screen?

**Mr. Roth:** There are a few companies over there, but there is no big competition. There is one company that just raised \$15 million and I will be not far away because I will be trying to get some concession, some leases.

**CEOCFO:** Is there equipment and personnel available in Eastern Europe or is that a problem?

**Mr. Roth:** These two companies that I know stock is trading at about \$10 and they will spend about \$50 million.

**CEOCFO:** So you have got the pieces in place.

**Mr. Roth:** Yes.

**CEOCFO:** Address the investment community; with so many companies to look at, what sets Royal Energy apart?

**Mr. Roth:** I have very good connections and our stock price is very low right now.

**CEOCFO:** Final thoughts, what should people remember most about Royal Energy Resources?

**Mr. Roth:** We are an Eastern European company with oil and gas leases and two are here in the United States providing royalties for a very small cost.

**The bottom line is to build up the company to be a giant, but since gold and silver are at the prices that they are and will continue for quite a few years, and I have a connection to the European countries and there is a history over there for the last 200 years where they did find gold and silver, and since it was a communist country for years, it was not so explored. Therefore, I am looking to make it big over there discovering and developing gold, silver and copper.**
