

Thunder Energies (TNRG) Advances the Development of a Real-Time Detector of Precious Metals in Mining Operations

TARPON SPRINGS, FL, January 24, 2019. Dr. Ruggero M. Santilli, CEO and Chief Scientist of Thunder Energies Corporation, a publicly traded company with stock symbol (OTC: TNRG) announces advances in the development of the real-time detection of precious metals in mining operations illustrated in the short movie (<http://pubrelco.com/index.php/tec-mining-dns>).

Dr. Santilli states: "As indicated in preceding releases, precious metals can be identified in real time via the detection of photons they emit when irradiated with neutrons. Our company is in production and sale of the basic equipment, that for the production of neutrons synthesized on demand from a hydrogen gas in the needed direction, numbers and energy (<http://thunder-energies.com/docs/TEC-DNS-3Za.pdf>). Photon detectors are commercially available. Therefore, we are seeking funds for the construction of a prototype Precious Metal Detection Station."

Forward Looking Statements

Certain statements in this news release may contain forward-looking information within the meaning of Rule 175 under the Securities Act of 1933 and Rule 3b-6 under the Securities Exchange Act of 1934, and are subject to the safe harbor created by those rules. All statements, other than statements of fact, included in this release, including, without limitation, statements regarding potential future plans and objectives of the company, are forward-looking statements that involve risks and uncertainties. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Technical complications, which may arise, could prevent the prompt implementation of any strategically significant plan(s) outlined above. The Company undertakes no duty to revise or update any forward-looking statements to reflect events or circumstances after the date of this release.
