### Specialty Communication Systems

Specialty communication systems are wireless networks designed to improve productivity for a specified application by communicating data, voice or video information in situations where land line networks are non-existent, more difficult to deploy or too expensive.

#### Service Capabilities:

- mobile communications
- emergency dispatching
- paging
- asset & vehicle tracking
- telematics
- supervisory control & data acquisition
- public safety
- security & video surveillance

*Approximate Segment Revenue: 80%*

#### Customers:

Amtrak, Caltrans, Harrah's Entertainment, General Electric, Lockheed Martin, Motorola, Del Webb/Pulte, AmCare

### Wireless Infrastructure Services

Wireless infrastructure services include the design, deployment and maintenance of wireless equipment for carriers to build and expand their networks, increase capacity, upgrade their networks with new technologies and maintain their existing infrastructure.

#### Service Capabilities:

- site design
- programming & alignment
- equipment upgrades & maintenance
- in-building
- automated test procedure
- re-banding & inter-modulation analysis
- tuning & optimization
- interference mitigation

*Approximate Segment Revenue: 20%*

#### Customers:

Sprint Nextel, U.S. Cellular, Cingular, Crown Castle, T-Mobile, Verizon, Bechtel

### Company Highlights

#### Market Driven Organic Growth:

The need for bandwidth, mobility and quick deployment is driving the demand for wireless solutions. WPCS serves high growth sectors such as public safety, gaming and healthcare.

#### Acquisition Experience:

WPCS has acquired and successfully assimilated seven acquisitions since 2002.

#### Financial Performance:

Through two quarters of FY2007, the company has achieved \$34.2 million in revenue, \$2 million in net income and \$0.34 EPS.
